OUR DATA

How to Load Data:

First , you download the dataset from the file (link above) and load data into Github so that the url is easily accessible. We will tidy the dataset (if needed) and then organize the column by year. We will identify the wages over time.

Some analysis questions can be the following:

- 1) What does the wage gap look like over time?
- 2) Is there inflation or not?
- 3) Do you notice any wage inequality based on gender, race, and ethnicity?

Empirical DATA
